X-RAY BILATERAL HIPS WITH AP PELVIS, THREE VIEWS

History: Left hip pain.

Findings: There is no evidence of a fracture or pathologic bone change. Calcifications project in the soft tissues posterior to the femoral heads and necks and are most likely residuals from intramuscular injections. No pathologic bone change.

IMPRESSION

Normal pelvis and bilateral hip series.

Interpreted by,

Robert Seapy, M.D.
EPIC Imaging West, Inc.
