Report

CLINICAL DATA: Osteopenia

COMPARISON STUDIES: None.

PROCEDURAL TECHNIQUE: DEXA scan of the left hip and lumbar spine.

FINDINGS: FINDINGS: Left hip: The bone mineral density of the left hip measures 0.949 g/cm2 which generates a T score of -0.6 and a Z score of zero. The WHO classification is osteopenia with increased fracture risk. Lumbar spine: The bone mineral density of the lumbar spine determined from L1 to L4 measures 1.062 g/cm2 which generates a T score of -0.3 and a Z score of 0.6. The WHO classification is normal with no increased risk of fractures..

IMPRESSION:

Osteopenia with increased fracture risk in the left hip.

Normal bone mineral density in the lumbar spine.
